  - Improved KPIs
  - Enhanced care planning and staff training processes
- Oct 2008 | Ealing, Hammersmith and West London College – **Award for determination and Progress**

## Profile

I bring a unique perspective to data-driven decision-making for the healthcare industry. Currently enrolled in the Career Accelerator course in Data Analytics at LSE. I have strong skills in Python, R, Excel, SQL, and Tableau, and I am eager to apply these in a dynamic data analytics role.

I am passionate about leveraging my healthcare experience and analytical skills to derive actionable insights, particularly in pediatrics and disability care. Fluent in English and Hungarian, with basic proficiency in German and French.

I excel in simplifying complex information, problem-solving, and communicating effectively with diverse teams. My goal is to improve patient care and outcomes through innovative data solutions.

## Work Experience

- **Nov 2019– Present – Agency Nurse**  
*Various Nursing Agencies (MedGen, Enviva, MedLocums)*
  - Providing nursing care for children including complex needs in home and various hospital settings.
  - Collaborating with multidisciplinary teams to develop care plans based on detailed data analysis.
- **2016 – 2019 – Senior Nurse/ Nurse manager**  
*Hounslow and Richmond Community Healthcare NHS Trust*
  - Led a team. Utilized Excel to manage patient data, identifying trends to improve KPIs and patient care outcomes.
  - Trained staff on healthcare protocols, improving overall efficiency and compliance through data monitoring and feedback.
- **2012 – 2013 – Registered Nurse**  
*Great Ormond Street Hospital*
- **2008 – 2012 – Duty Manager**  
*LIDL UK Ltd*
  - Managed a small team, coordinated departments, and resolved customer issues, demonstrating strong leadership and organizational skills.
